

Entrepreneurial Approaches to Sustaining and Scaling Educational Innovations

About the Course

This workshop kicks off a 2-week course that guides participants through the process of exploring innovative ways to solve problems that address the needs of your intended audience and/or market. The course is primarily for those in the ATE community who are interested in learning how to sustain and scale educational innovations and network with education-focused innovators. The workshop begins with an opening session at the HI-TEC conference and includes conducting interviews (approximately 10 one-hour interviews), attending online office hours and an online closing workshop.

Participant Benefits

- Explore the potential to sustain and scale education innovations beyond federal funding.
- Benefit from direct feedback and one-on-one office hours with expert instructors, and a pace and workload that accommodate working professionals.
- Awaken your inner edupreneur.
- Network with other education-focused innovators in the ATE community.

2-Week Course Agenda: July 22- August 9, 2019

- **Kick-Off Workshop** (St. Louis, MO): July 22 (full day)
- **Office Hours** (online): August 2-7: Two one-hour sessions arranged with instructors
- **Closing Workshop** (online): August 9

How to Register

Register for both the conference and workshop here: http://www.highimpact-tec.org/hitec2019_reg.php

No further steps are required to enroll in the full 2-week course. *Early registration is highly recommended as space is limited.*

Stipend and Costs

Participants who complete the two-week course will be given a \$500 stipend. Participants must register for the HI-TEC conference (\$500 with early registration), as well as the full-day kick-off workshop (\$200). *Participants must complete the entire two-week course to receive the stipend.*
