Or wait until the end!
Safe Zone Icons

Handout: When you see the green “H” on the screen, there is a handout associated with this slide. Find them online at diversity.asee.org/lgbtq/resources/

Caution/Avoid: When you see this icon, you should avoid using the word it is next to when discussing LGBTQ individuals and/or issues.

Activity: When you see the rainbow “A” on the screen, there is an interactive activity associated with this slide.
Introductions

• Alon McCormick (he/him/his)
• Linda Vanasupa (she/her/hers)
• Stephanie Farrell (she/her/hers)
Introductions

• What brought you here?
• What do you hope to learn?

• *Please type your response in the chat window*
Today’s Topics

1. Concepts of sex, gender, & sexual orientation
2. Heteronormative and cisnormative assumptions
3. LGBTQ identity development
4. The coming out process
5. Classroom and workplace inclusion strategies
6. Becoming an Ally

https://chatmosphere.files.wordpress.com/2012/01/how-to-be-an-ally.jpg
Honoring one another

R - Recognize your communication style
E - Expect to learn something about yourself and others
S - Speak clearly and use personal examples when making a point
P - Participate honestly and openly
E - Engage in the process by listening as well as speaking
C - Confidentiality, Curiosity and Charity
T - Take responsibility for yourself and what you say
What is a Safe Zone?

• A welcoming and supportive environment for LGBTQ students, faculty and staff on campus
• Stickers/signs help create a visible network of supporters
• Goal is a campus culture that is accepting of people with all sexual orientations, gender identities and gender expressions

SafeZONE
1. Sex, Gender and Orientation

Objective: Differentiate between concepts of sex, gender, & sexual orientation

- Concepts
- Terminology
LGBTQIA

Lesbian: A woman who is sexually attracted to other women

Bisexual: The space between hetero and homosexual

Queer: An umbrella term from those who wish to not categorize sex, sexuality, or gender

Asexual: Someone who does experience sexual attraction

Gay: A man who is sexually attracted to other men

Transgender: People whose gender identity, expression, or behavior is different from those typically associated with their assigned sex at birth

Intersex: A person who is born with a reproductive or sexual anatomy that doesn’t fit the typical female or male definitions

Modified from graphic created by Kayley Weinberg, 2014. www.now.org/
LGBTQIA

- Sex – assigned at birth based on anatomy
- Gender – result of socially constructed ideas of behavior, actions and roles performed based on sex
- Orientation – core sense of attraction

⚠️ avoid “preference”
Biological Sex

- Biological or medical classification
- Assigned at birth as Male or Female
- Intersex – when anatomy and chromosomes are not congruent or are not consistent with M/F designations
- Avoid “hermaphrodite”

Sex is expressed physically in many ways
Biological Sex

• Biological sex is more diverse & beautiful than most people ever consider…

http://ansp.org/about/press-room/releases/2015/rare-butterfly/

http://voices.nationalgeographic.com/2012/10/09/weird-wild-rare-maned-lionesses-explained/

“Neural, not gonadal, origin of brain sex differences in a gynandromorphic finch”
Gender

• **Gender identity** – one’s core sense of being male or female or both or neither

• **Gender expression** – one’s outward presentations and behavior, how others perceive a person’s gender

Gender is a spectrum of identity and expression
Gender terms

- Cisgender
- Transgender
- Gender fluid
- Non-binary
- Agender
- Gender neutral
- Genderqueer
Orientation

• The type of sexual, romantic, emotional attraction one feels for others, often based on gender
  • Gay
  • Lesbian
  • Bisexual / pansexual
  • Heterosexual / straight
  • Avoid “Homosexual”
  • Asexual

Orientation is a spectrum of attraction
Sex, Gender and Orientation
A multi-dimensional space

- Sex, gender, and orientation are 3 different things
- Each is experienced and expressed in a spectrum of ways
- They are not binary or fixed, not necessarily congruent with societal expectations

http://wissrech.iam.uni-bonn.de/research/projects/zumbusch/fd.html
2. Identity Development

Objectives:

1. Identify/recognize heteronormative and cisnormative assumptions
2. Compare LGBTQ and non-LGBTQ identity development
Normative assumptions

Normative – adj. relating to an ideal standard or being based on what is considered the correct way of doing something

Heteronormativity – the assumption that all individuals are heterosexual

Cisnormativity - the assumption that all individuals are cisgender
Cis / Heteronormativity

• Are subtle and pervasive
• Can imply that non-conformance is abnormal, undesired
• Leads to marginalization of those who do not conform to societal expectations
• If people are assumed cis/het by default, then LGBTQ folks have to explain that they are different
Identity development process

Typical Child

Heteronormativity
Cisnormativity

All is according to “plan”

Healthy heterosexual & cisgender Identity... and student, coworker, professor, sibling...
Identity development process

I'm Confused...

I'm isolated, I'm “other”

I'm “other” but not alone

Healthy LGBTQ identity

Student, coworker, professor, sibling...

LGBTQ Child

Heteronormativity

Cisnormativity

Hostility

LGBT Connections, Knowledge
Integration and intersection
Coming out

Objective:

• Explain and support the coming out process
3. Coming Out

Coming out – the process of accepting one’s sex, orientation, or gender identity, and sharing it with others

- **In the Closet** – describes a person who has not disclosed their gender identity or sexual orientation
- Can be “out” in one context and “closeted” in another
- **Outing** – involuntary disclosure of gender identity or sexual orientation
Risks of coming out
The importance of coming out

James Fitterling (2016)
Dow President and gay man
“For years I paid the penalty of trying to live separate work and personal lives. [when I came out] it was a huge burden lifted.”

since.
woman, embrace it. Turn it into an asset.”
Coming out

- It is a nonlinear process
- It is not a one-time event - it is ongoing, sometimes daily
- Everyone has different experiences and feelings
- It’s not safe (or desirable) for everyone in every situation – it’s a personal decision
When someone comes out to you

- Thank them for their trust
- Respect their confidentiality
- Let them know this does not change how you feel about them
- Ask how you can support them
- Commit yourself as an ally
- Learn and use the accepted terminology
- Learn about the LGBTQ community and their world
4. Inclusion strategies

• Objective: Use strategies to make your class and workplace more inclusive

- Recognize and Leverage Privilege
- Use Inclusive Language
- Use a Syllabus Inclusion Statement
- Respond to Bias
- Become an Ally
The ally spectrum

An ally is a member of the majority group who rejects the dominant ideology and advocates with and for an oppressed population.

Behold, the Straight for Equality Ally Spectrum®:

The “I'm not really an ally... but I'll listen.” Ally

The “I'm starting to get it.” Ally

The “I really said it!” Ally

The “I'm focusing my time on learning.” Ally

The “I'm talking about LGBT equality!” Ally

The “I'm Super Ally! Let's change some laws.” Ally
Heterosexual / Cisgender Privilege

- Acceptance and support from your parents and religious community
- Being allowed to use the restroom of your gender identity
- Adopting your children
- Access to STEM role models
- Being judged in the job by your talents (instead of sexual orientation or gender identity)
Responding to bias

When you hear an inappropriate (biased) comment or joke

- **Assume**: An LGBTQ individual is present
- **Ask yourself**: What message do you send by not responding?
- **Think about**: The difference between an ally responding and the LGBTQ individual responding
Examples of bias

1. A student makes a homophobic joke in class
2. A boss makes a derogatory comment about LGBTQ people
3. A woman noticed a wedding photo in the office of a gay colleague. She commented to co-workers, “I don’t care if he’s gay, but does he have to flaunt his sexuality?” (She has photos of “traditional” wedding/family in her office)
Responding to bias

• What do you mean by that?
• I’m surprised to hear you say something like that.
• I feel uncomfortable when I hear you talk about a person/group that way.
• I know you meant it as a joke, but I find it offensive.
Reframing normative assumptions

How would you reframe these normative assumptions?

- What does your wife/husband do?
- Do you have a boyfriend/girlfriend?
- Forms that ask gender: Male or Female?
Inclusive language

• Learn and use the correct terminology
• Use the correct pronouns
• Use inclusive relationship terms (date, spouse, partner)
• Use the same terminology the other person uses
• If you make a mistake, apologize.
• If someone else makes a mistake, correct unobtrusively
Inclusive classroom

- Bring a roster with last names only. Ask students what they want you to call them and record this name.
- Ask students their names and pronouns on the first day of class (see handout)
- Put a diversity statement on your syllabus (see handout)
- Put a safe zone statement on your syllabus (see handout)
- Tell students where to find the nearest gender-inclusive restroom
- Use multicultural examples –
  - highlight contributions of LGBTQ scientists and engineers
  - use LGBTQ-relevant examples
- Address bias in the classroom
How to be visible as an ally

• Attend or advise LGBTQ group meetings
  • https://www.ostem.org/

• Be visible
  • Sign on door or in office
  • Syllabus
  • Lectures
  • Events on campus

• Stand with your LGBTQ colleagues
About the Project
