

ASEE Learning Program Recording and Privacy Policy

All sessions of ASEE learning programs delivered online will be recorded, unless otherwise noted. Recordings will only be shared with registered participants. These recordings are intended for individual use and viewing only and should not be downloaded, copied, or distributed to other individuals or groups. ASEE cannot guarantee how quickly recordings are made available to participants following a specific program session, as this depends on file size, bandwidth, and other related considerations. Recordings will be accessible for six (6) months from the end date of a program, unless otherwise noted.

As an organization dedicated to quality of service and continuous improvement, recordings may be used by ASEE to collect data about facilitator performance and the overall participant experience. This data will only be used internally, in an effort to continuously improve ASEE's learning programs. ASEE will not share session recordings with the public or other clients.
